

James Flynn

(650) 714-1928 | jamesflynn@gmail.com | Cambridge, MA | linkedin.com/in/jamespatrickflynn

Product Leader with 15 years building products and product organizations across AI, Privacy & Regulatory Compliance, Biometrics, Speech, Fintech, and Hardware at Google, Samsung, and venture-backed startups. Two exits.

- Builder of AI-powered product development workflows; cut key consent design stages at Google from months to hours by studying workflows and encoding internal expertise into automated, human-reviewable AI systems
- Repeatedly designed and established product organizations for rapid product development; Techcombank's first cross-functional product team, Neurable's 20+ person company-wide realignment, and the founding team behind Samsung Family Hub's hero application.
- Engineer-turned-leader; equally at home in technical deep dives, strategy and roadmap, GTM, and regulated industries; patent holder in hardware and signal processing. Reputation for rigorous, outcome- and evidence-driven strategy, for earning trust in high-stakes environments, and for aligning organizations behind a plan they own.

EXPERIENCE

Neurable

Boston, MA

Head of Product

March 2026-Present

Key Responsibilities

- Recruited to reboot product strategy; realigned and mobilized the company around new goals and an operating model built for rapid product-market-fit discovery, now executing.
- Own product vision, strategy, and roadmap across integrated hardware and software

Product Portfolio

- **Product Operating Model** - company-wide structure, cadence, and decision framework for rapid PMF discovery

Google

Cambridge, MA

Senior Product Manager, Privacy & Consent — Google Core

January 2024-March 2026

Key Responsibilities

- Led AI integration for privacy consent workflows, reducing parts of the consent design process from months to hours by encoding internal expertise and automating requirements analysis with detailed decision tracing for human review
- Owned redesign and synchronized relaunch of the Google DMA consent flow across YouTube, Search, Play, and Google Ads after supporting negotiations with the European Commission and Italian Consumer Authority, impacting ~50M users annually across the EU

Product Portfolio

- **AI Consent Design** - automated generation of compliant, UX- and business-optimized consent designs, including a prototype generator for global jurisdiction variants, replacing a fully manual process
- **Consent Go-to-Market** - compliant user onboarding and consent campaigns for Google Search, Ads, Maps, YouTube, Play, Wallet, Pixel, and Gemini
- **Self-Service Platform** - end-to-end process and documentation for client teams, with OKRs and KPIs tracking adoption and operational efficiency measurement.

Senior Product Manager, Speech Recognition — Google Assistant

April 2020-December 2023

Key Responsibilities

- Owned product strategy, onboarding, privacy, trust, and compliance for voice invocation and biometric voice identification for 100M+ global users
- Directed product roadmap and expansion of biometric voice ID from a single product (Assistant) to all Google products, including Gemini

Product Portfolio

- **Voice Identification** - improved enrollment completion rate by 5%; devised and launched a novel false-accept mitigation feature using behavioral and environmental signals, driving a >10% reduction in invocation false accepts
- **AADC Compliance** - EU Age-Appropriate Design Code compliance for minors across Google Assistant, delivered in full compliance by the regulatory deadline

IDEO Design

Cambridge, MA

Product Development

January 2019-March 2020

- Conducted market analysis and go-to-market strategy informing Samsung's build/buy decision in the connected home fitness hardware market

- Prototyped an SME-facing electricity use and dynamic pricing product concept for a Fortune 100 energy company, conducting user research and defining product-market fit

Techcombank

Hanoi, Vietnam

VP, Digital Banking

October 2016-December 2018

Key Responsibilities

- Led digital transformation for retail banking; designed and established the bank's first cross-functional product team, overcoming significant institutional friction to build agile product development capability from scratch
- Early app releases under the new team structure reduced bank's monthly payment platform fees by >\$100K USD

Product Portfolio

- **Digital Banking Platform** - product roadmap and OKRs; improved App Store rating from 3 to 4 stars through user research-informed iteration

Samsung Next

San Francisco, CA

Director, Technology & Product

September 2013-September 2016

- "CEO Founder" of a cross-functional team that invented and developed the hero app for **Samsung Family Hub**, a family coordination app with a large wall-mounted touchscreen, from concept through acquisition by Samsung
- Owned end-to-end product roadmap, go-to-market strategy, stakeholder management, and KPIs from 0-to-1 through acquisition; offered Product Lead position for Samsung America Product Innovation Team upon exit

Extrasensory Devices

Palo Alto, CA

Founder

June 2011-September 2013

- Founded hardware + software startup; shipped multiple products combining mobile apps with hardware accessories; company acquired
- First product (photographic light meter accessory and app) raised \$120K on Kickstarter and was featured on the Kickstarter homepage

SparkFactor Design

Palo Alto, CA

Product Manager

June 2011-May 2012

- Designed and developed integrated hardware and software products, including a point-of-sale interface for a robotic pizza truck prototype

Wideband Semi / Zeiss Meditec

Bay Area, CA

FPGA/ASIC Engineer

July 1999-June 2011

- DSP and control logic design for communications and medical device FPGAs and ASICs; multiple patents.

EDUCATION & CERTIFICATIONS

Harvard Business School

Boston, MA

Program for Leadership Development (PLD)

January 2025

IAPP

Certified Information Privacy Technologist (CIPT)

2024

The University of Canterbury

New Zealand
